The America Recovery and Reinvestment Act of 2009

Overview

On February 17, 2009 President Barack Obama signed into law the American Recovery and Investment Act of 2009 (Act). The Act is a sweeping economic stimulus bill that provides resources to various programs and other efforts with the purpose of reinvigorating the nation's economy. According to the Obama administration, the \$787 billion package will create or save approximately 3.5 million jobs over the next two years and invest funds in a variety of different sectors, including: health care, energy, infrastructure, education and public safety.

General Provisions and Accountability and Transparency Provisions

The Administration has taken steps to ensure that funds distributed from the Act will be subject to vigorous transparency and accountability. Included in the Act are several general provisions that would 1) restrict usage of funds from certain projects, including zoos, aquariums, golf courses, swimming pools, or casinos; 2) include a Federal prevailing wage requirement; 3) require that buy American provisions are upheld; and 4) require compliance with the National Environmental Policy Act (NEPA). Additionally, the following measures have been taken to ensure accountability:

Certifications: A Governor, Mayor or other chief executive must certify that infrastructure investments have been fully vetted as required by law and are an appropriate use of taxpayer dollars. Certification shall include a description of investments and estimated total funds to be used. Certification will be posted the government website www.recovery.gov and is required before funds will be made available.

Reports on use of Funds: Recipients must submit a report to the federal agency from which it receives funds stating 1) total funds received; 2) amount expended or obligated; 3) list of projects or activities with details on jobs created and retained and, for state and local governments, a description of purpose, total cost and rationale for funding the investment with Act funds and a point of contact; and 4) detailed information on subcontracts or sub-grants awarded. Funding recipients must also register with the Central Contractor Registration Database.

Federal Oversight: A new federal agency has been established to coordinate and conduct oversight of funds to prevent fraud, waste and abuse.

Protections: The act prohibits retaliation against whistleblowers.

Important Federal Grant Information

Counties will be required to register with the federal government in order to receive grant funding. The federal government uses a central website for all discretionary grant applications, known as FedConnect. Applicants need to obtain a DUNS (Data Universal Numbering System) number. A DUNS number is a unique number that identifies an organization and helps track the distribution of grant money. The web link for submitting applications through FedConnect is:

https://www.fedconnect.net/FedConnect/PublicPages/FedConnect_Ready_Set_Go.pdf.

Before submitting an application through FedConnect each organization must complete the following steps:

- Step 1: Request a DUNS Number at <http://fedgov.dnb.com/webform/displayHomePage.do>
- Step 2: Register with the Central Contractor Registry (CCR) at <http://www.ccr.gov/>.
- Step 3: E-Business Point of Contact must register in FedConnect at <https://www.fedconnect.net/FedConnect/>.
